FALL 1937 — SPRING 1938

In presenting this list we wish to thank all our old customers, and if you have never bought from us, we urge you to at least look at our stock and get our prices before ordering elsewhere. It is too expensive to issue a complete price list. There are so many varieties, sizes and ages, we merely endeavor to show you about what we grow, and give you an idea of the cost. Many items are not listed, and we have quantities of stock smaller and larger than quoted. Prices also change, and the price on ten or more plants is less than the each price quoted, but you know the customer pays the advertising expense, including catalogue, salesmen's commissions, etc., and the more expense, the less plants you get for your money. So come and see us, or write, but don't delay planting. Shrubs, trees and flowers add dollars to the value of your property, to say nothing of the pleasure in watching them grow, and picking your own tree-ripened fruit. Many fruits bear the next year after planting. There is no best time to plant — anytime the soil is in condition from Nov. 1st till May 1st is a good time. Our stock is carefully handled, and all carries a certificate of inspection, guaranteed true to name, and in first-class condition when it leaves the nursery. Beyond that we have no control, as we do not know what the season will be, nor how you will handle the stock. No charges for packing or delivery to express company. No shipping order accepted for less than One Dollar. Terms Cash. Also do some trading for wood, posts, hay, grain or what have you. Abbreviations used, B and B, baled and burlapped, dug with large ball of earth, can be handled nearly any time of year. Book your order now, while assortment is complete.

Fruit listed about in order of ripening.

APPLES

Early Harvest - Yellow Transparent - Sweet Bough - Maiden Blush - Anoka - Hart - Jonathan - Rome Beauty - Mo. Pippin - Mammoth Black Twig - Limber Twig - Delicious - Yellow Delicious - Geniton - Winesap - Transcendent Crab Apple.

STRAWBERRIES: Klondike - Blakemore, \$1.00 per hundred. Mastodon, \$2.00.

MEMBER OKLAHOMA STATE NURSERY ASS'N

ALL STOCK INSPECTED

Rose's Orchard and Nursery

We grow a complete line of Nursery Stock. Fruit Trees, Shade Trees, Evergreens, Ornamental Shrubs and Vines, Grapes, Berry Plants, and Rose's German Iris, and Hardy Chrysanthemums, in many varieties. Also hardy garden roots, such as Asparagus, Rhubarb and Sage. Paper-shell Pecans, Thomas Black Walnut and Jap Persimmons. In Peaches alone we propagate twenty varieties; Plums, sixteen varieties. We own the original tree of the Shawnee Apricot. This tree is nineteen years old, and is one of the surest tree fruits for this section—a very late bloomer. This tree has borne seven crops of fruit in the last eight years. We have several hundred trees, budded from the original tree, for delivery this fall. Other valuable varieties which have originated here at home and are being propagated and sold by us are the Hunter and Moore Peaches, the C. C. Hawk, Strawn, and Old Taylor Plums, Seminole Blackberry, and many others. We have a large old orchard of the leading commercial varieties, also a young orchard of about 350 trees. This orchard contains about all the standard fruit varieties, grown in this section, and was very carefully selected, to be not only true to name, but from the best individual specimens of each variety. From this bunch of trees we get our buds and grafts used in growing the trees we sell to you. That is what constitutes a pedigreed tree. We have no salesmen and therefore no commissions to pay. Our advertising is mostly done for us by satisfied customers. For every dollar you spend with us, you get a full dollar's worth of plants, and exactly the varieties you order. If you wish the best success in your plantings, use native grown stock—they are best, and come and see what I have to offer before you buy. Growing plants is my business and hobby and I take pleasure in it. Am always glad to welcome visitors and show you the old stool trees and plants, and the little trees propagated from them, which are growing in the nursery rows. If there is any help we can give about planting, varieties, landscaping, etc., we will be glad to help you. Will publish a variety and price list about September 1st. It is yours for the asking. Come and see us.

ROSE'S ORCHARD AND NURSERY

PHONE 9528-F-5

SHAWNEE, OKLA.

Located on North Union, 1/2 mile north of North St., or 3 miles north of Main Street.
